

1 Basic information

Name: Weir, David James
Date of CV: 13th September 2019

1.1 Date and place of birth, nationality, current residence

Date and place of birth: 21st December 1985, Glasgow, United Kingdom
Citizenship: British
 [Application for Finnish citizenship pending since 15.05.2018]

Contact address: Helsinki Institute of Physics
 PL 64 (Gustaf Hällströmin katu 2)
 00014 University of Helsinki, Finland

Email: david.weir@helsinki.fi
Phone: +358 40 6545364 (mobile) or +358 50 4485604 (office)

2 Current positions

Sep. 2019 - present: Associate Professor, University of Helsinki
 Academy Research Fellow, Helsinki Institute of Physics

2.1 Education and degrees

Academic degrees:

Oct. 2007 - Sept. 2011: PhD in Theoretical Physics, Imperial College London
 Supervisor: Arttu Rajantie
 Title: *Quantum mechanics of topological solitons*
 Examiner: Philippe de Forcrand

Oct. 2003 - June 2007: MSci Physics with Theoretical Physics, Imperial College London
 Dissertation Supervisor: Andrew Parry
 Abdus Salam Prize (best student in year); 1st Class Honours

Docentship:

June 2018: Title of Docent in Theoretical Physics, University of Helsinki

2.2 Previous employment

Apr. - Aug. 2019: STFC Ernest Rutherford Fellow, University of Nottingham
 (90% full time)
 May 2018 - Aug. 2019: University Researcher, Helsinki Institute of Physics
 (10% full time Apr. - Aug. 2019)
 Sept. 2016 - Apr. 2018: Postdoctoral Researcher, Department of Physics
 University of Helsinki
 Sept. 2014 - Aug. 2016: Marie Curie fellow, Institute of Mathematics and Natural Sciences
 University of Stavanger
 Sept. 2011 - Aug. 2014: Postdoctoral Researcher, Helsinki Institute of Physics
 University of Helsinki
 July 2007 - Sept. 2007: OpenLab summer studentship, Department of Computing, CERN

3 Qualifications in research and doctoral training

3.1 Scope of publications

- 29 published or submitted refereed journal articles.
- 3 papers accepted or published in *Physical Review Letters*.
- 3 single-author publications, one of which is a review.
- 9 articles in conference proceedings.
- On Google Scholar, 1116 citations in total, and h -index of 16.
- My work has been featured on the front cover of *Physical Review Letters* as well as in the popular press, on the cover of *New Scientist*.

3.2 International activities

[Since 2015 I have been a member of the LISA Cosmology Working Group, and was appointed to the LISA Consortium as a full member in 2018.]

International invited talks and lectures, in addition to invited seminars to research groups (five in 2018) and contributed talks at international meetings (four in 2018):

- 2019 Opportunities at Future High Energy Colliders workshop, IFT Madrid (forthcoming)
- 2019 Amsterdam Cosmology Meeting, Amsterdam (forthcoming)
- 2018 ECT* composite dark matter workshop, Trento
- 2018 Prospects for charged Higgs discovery at colliders, Uppsala
- 2018 Aspen Center for Physics, Aspen, Colorado
- 2017 Chinese Spring School on Gravitational Waves, KITP China, Beijing
- 2017 Royal Society Theo Murphy meeting, Kavli Royal Society Centre, England
- 2016 CERN Theory Workshop ('The Big Bang and the little bangs'), CERN, Geneva
- 2016 MIAPP Topical Workshop ('Why is there more matter than antimatter?'), Munich
- 2015 SFB/Transregio 55 ('Hadron Physics from Lattice QCD') Workshop, Wuppertal

[all invited talks and lectures have concerned gravitational waves in the early universe]

Organisation of international events:

- 2018 Co-organiser, Fifth LISA Cosmology Working Group workshop, Helsinki
- 2017 Co-organiser, Amherst Center for Fundamental Interactions workshop ('Making the Electroweak Phase Transition (Theoretically) Strong'), UMass Amherst
- 2016 Strong and Electroweak Matter 2016 local organising committee, Stavanger
- 2015 Main organiser, Second LISA Cosmology Working Group workshop, Stavanger

International event attendance:

- 2019 Invited attendee, Science Foo Camp 2019, Google X, Mountain View (forthcoming)
- 2019 Invited attendee, Sixth LISA Cosmology Working Group workshop, Madrid
- 2018 Invited attendee, Science Foo Camp 2018, Google X, Mountain View
- 2017 Invited attendee, Fourth LISA Cosmology Working Group workshop, Mainz
- 2017 Invited attendee, Science Foo Camp 2017, Google, Mountain View
- 2016 Invited attendee, Third LISA Cosmology Working Group workshop, DESY

3.3 External research funding and projects

In addition to an internal University of Helsinki Three-Year Project Grant for the years 2018-2020 (150 000 euros), and faculty support funding for 2018 based on a high grade for my last Academy of Finland application (35 000 euros):

- Academy Research Fellow, Sep. 2019 - Aug. 2024
(personal advanced fellowship; value 439 000 euros)
Topic: 'LISA and the electroweak phase transition'
- STFC Ernest Rutherford Fellowship, Apr. 2019 - Mar. 2024
(personal advanced fellowship; approx. value 500 000 euros; will vacate Aug. 2019)
Topic: 'Gravitational wave cosmology for LISA'
- European Commission Marie Curie intra-European Fellowship, Sep. 2014 - Aug. 2016
(personal fellowship; value 231 000 euros)
Topic: 'Electroweak phase transition beyond the Standard Model'
Results: Ten papers directly resulting from the fellowship
Impact: Coverage in popular press, hosted international workshop on gravitational waves
- Academy Postdoctoral Researcher, Sep. 2014 - Aug. 2017
(declined in favour of Marie Curie fellowship; value 252 000 euros)
Topic: 'Electroweak phase transition beyond the Standard Model'

In total, nearly 1.5 million euros of funding granted in the past five years.

Peer-reviewed national and international high performance computing projects:

- CSC (Finnish centre for high performance computing) Grand Challenge grant
'Simulations of cosmic networks' (May 2017 - Apr. 2018)
Principal Investigator; 10M computer hours
- Partnership for Advanced Computing in Europe Tier-0 grant
'Gravitational waves from early universe phase transitions' (Apr. 2015 - Mar. 2016)
Principal Investigator; 17.6M computer hours

3.4 National and international research collaboration

Full member of LISA Mission Consortium and LISA Cosmology Working Groups.

Other current international scientific collaborations include:

- Hiren Patel and Michael Ramsey-Musolf, UMass Amherst: Gravitational waves and phase transitions in the triplet-extended Standard Model.
- Chiara Caprini and Dani Steer, APC, Université Paris 7: Turbulence after a first-order phase transition in the early universe.

3.5 Postdoctoral supervision

- Oliver Gould, Postdoctoral researcher, June. 2018 - present: Main supervisor

3.6 Postgraduate supervision

[Completed prior to summer 2018: one Bachelors, two Masters and two Doctoral theses.]

Current Masters and doctoral students:

- Jani Dahl, Doctoral thesis, Sept. 2018 - present: Co-supervisor
- Lauri Niemi, Doctoral thesis, Sept. 2018 - present: Co-supervisor
- Daniel Cutting, Doctoral thesis, Sept. 2016 - present: Co-supervisor
- Anna Kormu, Masters thesis, Sept. 2018 - present: Main supervisor

4 Teaching qualifications

4.1 Teaching experience

- 2017 Invited lecture course in gravitational waves, KITP China Spring School (Beijing)
- 2017 Developed and taught 2 credit course:
Gravitational waves and cosmology (Helsinki)
- 2014 Taught 10 credit Master's course:
Quantum Mechanics II (Helsinki)
- 2010-13 Annual short Masters course in lattice field theory (Imperial)
- 2009 Teaching assistant, Quantum Field Theory (Imperial)
- 2008-09 Teaching assistant, Undergraduate Laboratory (Imperial)
- 2008 Teaching assistant, Real Analysis (Imperial)

4.2 Production of teaching materials

- Concept, syllabus and material for 'Gravitational waves and cosmology' course.
- Complete set of typset lecture notes for 'Quantum Mechanics II' course.

5 Other academic merits

5.1 Other activities

- 2016 Co-organiser of particle physics and cosmology exhibition,
Vitenfabrikken Science Museum, Sandnes, Norway
- 2015- Public talks and lectures on gravitational waves (Stavanger and Helsinki)
- 2015- Member of LISA Cosmology Working Group
- 2013- Referee for Physical Review Letters, Physics Letters B, Physical Review D,
Journal of Cosmology and Astroparticle Physics, and Europhysics Letters

5.2 Membership of university committees

- 2018- Member, Helsinki Institute of Physics Communications Group
- 2017- Member, Organising Committee, Departmental Colloquia, Helsinki
- 2017- Member, Departmental Wellbeing Committee, Helsinki

Other information

Language skills

English - Native; Finnish - B1/B2; French - B1; Norwegian - A2.

David J. Weir - Publication List

List current as of 13th September 2019.

A: Peer-reviewed scientific articles

Journal articles

- [A1] Lauri Niemi, Hiren H. Patel, Michael J. Ramsey-Musolf, Tuomas V. I. Tenkanen and David J. Weir, *Electroweak phase transition in the Σ SM - I: Dimensional reduction*, *Phys. Rev. D* **100** 035002 (2019) [arXiv:1802.10500].
- [A2] Tyler Gorda, Andreas Helset, Lauri Niemi, Tuomas V.I. Tenkanen and David J. Weir, *Three-dimensional effective theories for the two Higgs doublet model at high temperature*, *JHEP* **1902** 081 (2019), [arXiv:1802.05056].
- [A3] Mark Hindmarsh, Anna Kormu, Asier Lopez-Eiguren and David J. Weir, *Scaling in necklaces of monopoles and semipoles*, *Phys. Rev. D* **98** 103533 (2018), [arXiv:1809.03384].
- [A4] Jens O. Andersen, Tyler Gorda, Andreas Helset, Lauri Niemi, Tuomas V. I. Tenkanen, Anders Tranberg, Alekski Vuorinen and David J. Weir, *Nonperturbative analysis of the electroweak phase transition in the Two Higgs Doublet Model*, *Phys. Rev. Lett.* **121** 191802 (2018), [arXiv:1711.09849].
- [A5] Ray J. Rivers, Danièle A. Steer, Chi-Yong Lin, Da-Shin Lee and David J. Weir, *When are two fermions a simple boson? New Gross-Pitaevskii actions for cold Fermi condensates*, *Ann. Phys. (N.Y.)* **396** 495 (2018), [arXiv:1609.05435].
- [A6] Daniel Cutting, Mark Hindmarsh and David J. Weir, *Gravitational waves from vacuum first-order phase transitions: from the envelope to the lattice*, *Phys. Rev. D* **97** 123513 (2018), [arXiv:1802.05712].
- [A7] Anders Tranberg, Sara Tähtinen and David J. Weir, *Gravitational waves from non-abelian gauge fields at a tachyonic transition*, *JCAP* **1804** 012 (2018), [arXiv:1706.02365].
- [A8] David J. Weir, *Gravitational waves from a first order electroweak phase transition: a brief review*, *Phil. Trans. Roy. Soc. A* **376** 0126 (2018), [arXiv:1705.01783].
- [A9] Mark Hindmarsh, Stephan J. Huber, Kari Rummukainen and David J. Weir, *Shape of the acoustic gravitational wave power spectrum from a first order phase transition*, *Phys. Rev. D* **96** 103520 (2017), [arXiv:1704.05871].
- [A10] Mark Hindmarsh, Kari Rummukainen and David J. Weir, *Numerical simulations of necklaces in SU(2) gauge-Higgs field theory*, *Phys. Rev. D* **95** 063520 (2017), [arXiv:1611.08456].
- [A11] Tomáš Brauner, Tuomas V. I. Tenkanen, Anders Tranberg, Alekski Vuorinen and David J. Weir, *Dimensional reduction of the Standard Model coupled to a new singlet scalar field*, *JHEP* **1703** 007 (2017), [arXiv:1609.06230].
